DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 16 and 18 in the reply filed on 10/22/08 is acknowledged.

Claims 12, 17, 19, and 20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/22/08.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16 and 18 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 recites the limitation "the technical device error" in the last line. There is insufficient antecedent basis for this limitation in the claim.

Claim 16 depends from claim 18 and incorporates the same deficiency.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Slater US 4,872,106 (provided by Applicant).

18. A method for operating a redundant automation system for controlling a technical device (e.g., col. 1 lines 11-16), comprising:

operating a first automation device as a master (e.g., Fig. 2, col. 3 line 35: “primary processor”);

operating a second automation device as a standby (e.g., Fig. 2, col. 4 line 58: “back-up processor”);

storing status data of the first and second automation devices in a memory unit (e.g., Fig. 2 #46, col. 5 line 60 – col. 6 line 14) wherein a common memory area of the memory unit can be written to and read from both said first and said second automation devices, wherein the data present in the memory area is available in parallel to the automation devices (e.g., col. 2 lines 1-4, col. 6 lines 39-64);

sensing, with the use of a monitoring module operatively coupled to both said first and said second automation devices (e.g., col. 5 lines 46-59), for the presence of a vital sign from said first automation device for a change and when no change is sensed during a given cycle of

operation, then making a switchover to the standby automation device that takes over the function of the former master automation device (e.g., col. 7 line 45 – col. 8 line 7); and,

wherein there is present in the common memory area status data which describes the current operating status of the technical device and the automation system immediately before the technical device error occurs in the master automation device (e.g., col. 5 line 60 - col. 6 line 14, col. 6 lines 39-64).

16. The method as claimed in claim 18, wherein the switchover is performed in a jolt-free manner such that a portion of the data residing in the common memory area is immediately processed by the standby automation device as the current status image of the technical device and the automation system (e.g., col. 6 line 39 - col. 7 line 7).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
